

CORD ASSEMBLY INSTRUCTIONS FOR 40in. Lampposts #4805 & #4811

CONTENTS :

- 1 Plastic Lamppost
- 1 Electric Cord Set with 5 watt bulb
- 1 Double « L » Bracket
- 2 Screws
- 1 Important Safety Instruction Sheet
- 1 Cord Assembly Sheet

ASSEMBLY INSTRUCTIONS :

Read Before Starting

1. Insert a 5 watt bulb into the socket and tighten securely. Plug into 110 volt outlet to check that the bulb lights.
2. Holding the base of the lamppost, pull firmly on the lantern top. The lantern top will snap off.
3. Insert the bulb and socket of the double « L » bracket through the hole on the lantern top.
4. Place the holes in the double « L » bracket over the holes in the lantern top. Then, screw them together.
5. Run the cord down into the post.
6. Gently snap the lantern top onto the post.
7. Retrieve the cord through the hole at the bottom of the post.
8. Gently, pull the cord through the hole.
9. To stabilize the lamppost, fill the base with sand or gravel.

NOTE : To eliminate possible electrical shock or short, be careful not to damage cord if using a metal rod when securing lamppost in ground (rod not included)
